

Street Business School (SBS) works with our partners across multiple goals to leverage our proven entrepreneurship curriculum that empowers women to rise out of deep poverty and create healthier, more sustainable communities. Our partners represent a variety of missions, yet all share an understanding that poverty is exacerbating the issue they are seeking to resolve. SBS can be tailored to meet the unique organization, while delivering the same, quantifiable results. **We are excited to have partnered with the below organizations that work to achieve 14 of the 17 United Nations Sustainable Development Goals in the diverse issue areas outlined.**
